

GENESIS

HW 25-12 ROTARY TRANSFER MACHINE

A 'NEW' SOLUTION TO AN 'OLD' PROBLEM
starting at
\$590,000

Genesis HW 25-12 Currently Available for Fast Delivery

The Genesis is a 12 Station Legacy HW 25-12 Rotary Transfer Machine made of all new components and is currently available for fast delivery to kick start your machine into production with no worries.

The Genesis HW 25-12 has the capability of providing tremendous versatility and flexibility in a turnkey machining system. With 1" capacity, this machine is ideally suited to produce parts from bar stock or blanks up to 4" in length. Consistent, high productivity and precise machining, combined with the elimination of costly secondary operations make the Genesis HW 25-12 machine a new solution for cost effective manufacturing.

Machine Specifications

- HW 25-12 Basic Machine w/Control Pivot
- Electric Control Cabinet w/programmable controller and IEC motor starters.
- Pendant Arm w/Quick Panel Jr. Touch Screen Operator Control
- Hydraulic Power Pack
- Chip Conveyor w/ Single or Dual Bag Filter and Magnetic Drum
- 12' Magazine Bar Feeder
- Operators Platform
- Gearbox AE160 Cutoff Unit w/ Quick Change Arbor
- Lexan Lid and Ring Enclosure w/Center Hinge
- Inverting Unit WDE20 w/ Electronic Control Valve
- (3) VE 35/60 Toolspindle Unit HSK
- Recessing Unit EIE 36/100
- Threading Unit GWE 35/60, QCLS
